

Changes in Castle Design →

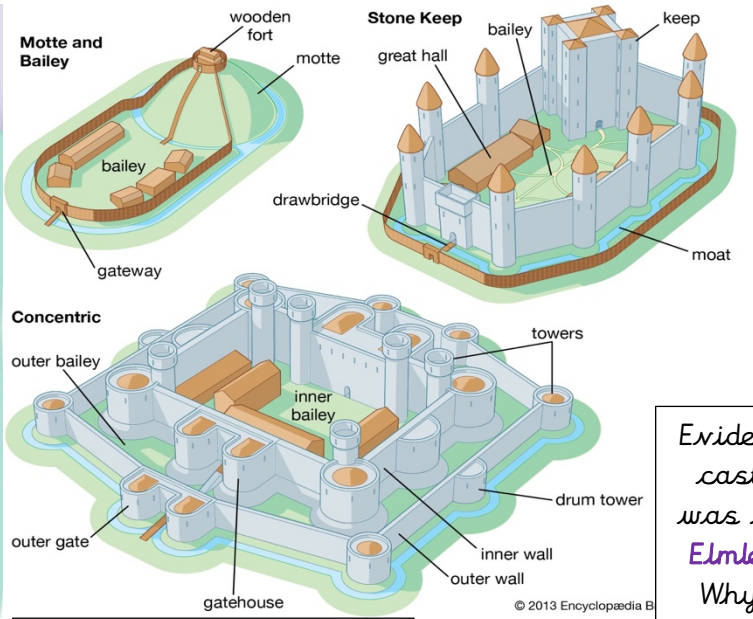

The Tower of London, was the first stone tower to be built in England. It was created by King William in 1070.

Anglo Saxon Burhs were the first type of castles.

The Normans improved castle design and introduced the Motte and Bailey Castle Design.

The Normans started to use stone to build important castles. This made them stronger.

Evidence of the castle which was located at Elmley Castle. Why do you think the village is named Elmley Castle?

Anything longer ago than 80 years.

80 Years

Beyond living memory

Castles were built beyond our living memory.

Living Memory

The main reason for castles were for protection of the people living there.

Lots of major towns and cities in The UK have castles you can visit.

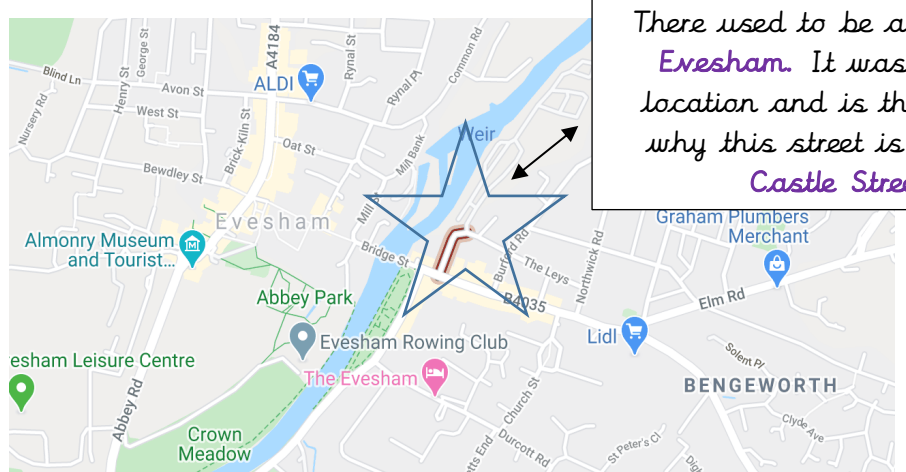

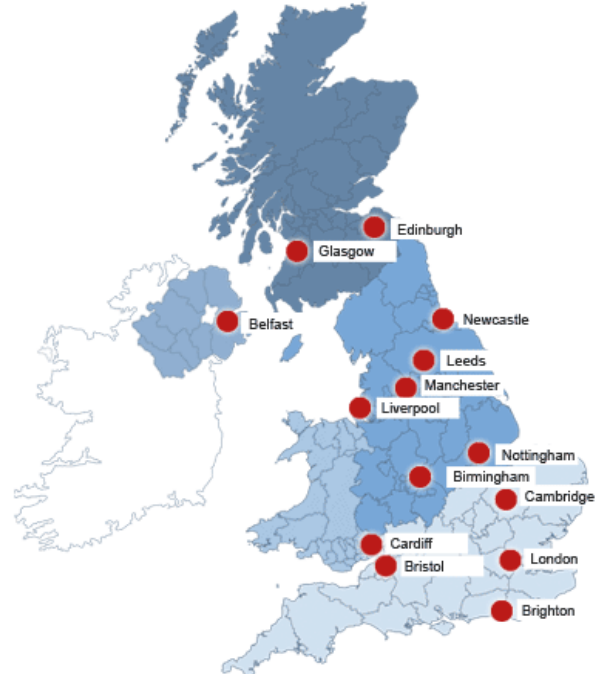

The capital cities of the UK all have castles you can visit.

Castles used natural features for protection such as rivers, forests, and hills to make it harder for them to be attacked.

Forests and plants are very common in traditional stories. This is a map of Little Red Riding Hood's main locations.

There used to be a castle in Evesham. It was in this location and is the reason why this street is called... Castle Street

You can see features of a flower in the rose that appears in Beauty and the Beast: Petals, flower, stems, leaves, branches and roots.
